

Makeup Table

User's manual

Parts list

table x 1

mirror x 1

metal leg x 1

side table x 1

foot pad x 6

wood leg x 6

screw x 6

screw washer x 6

wrench x 1

charger x 1

Installation Steps

1. Stick the 6 foot pads on the 6 wooden legs and set them aside. The foot pads are anti-slip and anti-wear, and can effectively protect the ground.
2. Turn the side table over and install the 4 wooden table legs on the bottom of the side table.
There are four screw holes on the bottom of the side table, just rotate the legs into the reserved screw holes and the side table is installed.
3. Turn the table over and we can see that there are 6 reserved holes on the left and right sides of the bottom of the table.
We can choose to install the metal table legs on the left or right.
Align the 3 holes of the metal table legs with the reserved holes at the bottom of the table, then place the screw washers, and then screw the screws in. The wrench can be used to fix the screws.
4. Take out the remaining 2 wooden table legs and install them on the other side of the table (the side without the metal legs). Rotate the wooden table legs into the reserved screw holes. (Note: install the wooden legs in the upper and lower holes, not in the middle hole.)
5. Use 2 screws to rotate and fix the base and mirror surface of the mirror, and the mirror installation is completed.
6. Place the side of the table with wooden legs on the side table so that the table can stand steadily. Then place the mirror on the table.
Connect the adapter to the power ports on the back side of the mirror and the back side of the side table, then use the adapter to connect the power supply.
The entire makeup table is now ready for use.

Functions

Functions

Support mobile phones with wireless charging function on the market. The phone can be charged by placing it in the corresponding area.

No indicator light: the table is not powered on
Blue light: the table is powered on and in standby status
Red light: the wireless charging is working

Operations

Short press the switch to turn on the light
Short press again to switch the light color
Long press to adjust brightness
Short press after a while to turn off the light

There are 1 x USB & 1 x Type C ports in 1 panel. While, the panel could be installed on left, right or both sides of table which depends on your needs.

These non-wireless-charging enabled devices could be charged via these ports
On this model, only the USB port can be used.

The two speakers would be installed on the left and right sides of table respectively

You could enjoy the pleasant music via blue-tooth speaker.
